## **Auto-Complete Forms**

Eliminate manual errors by leveraging real-time data stored in ServiceNow to auto-complete forms. Setting up auto-complete is a snap. Whether a single form or thousands of documents, DocGenerator has no limit on the number of templates it can support and no limit on the number of forms it can auto-generate.

## **Quick-start Form Wizard**

Quickly and easily map fields in ServiceNow to fields and locations on a document or form to streamline auto-completion of documents. Quick-start form wizard is so easy any power user can add or update a new form in an instant eliminating the need for expensive and time consuming programming and development of custom configuration of each document.
