

# U.S. Army

**Streamlining decision making processes, procedures, and more**

Effective leadership and success in the Army requires a robust and well-trained organization. Army personnel must be able to use their assigned equipment to execute their tasks as a team. This requires effective tools and technologies to ensure assigned work - whether in planning, training, or execution of operations - is documented, certified, executed correctly, and delivered on time. Legacy tools for task management (TMT), Troop Leading Procedures (TLPs), and Military Decision Making Processes (MDMPs) are too rigid expensive and ineffective for the demands of today's Army, including emerging PLEX and TRex initiatives.

Today's Army needs Tasker, built on ServiceNow, to create and deploy standard processes, dynamic templates, and more to ensure current operations (CUOPS) and future operations (FUOPS) are accurately assigned, tracked, managed, documented, and delivered. Leaders, commanders, staff, subordinate headquarters, and others throughout the Army require Tasker to manage everything from procedures and processes to correspondence management and employee/human resource required task assignments. Tasker is the only work management solution that also features the highest standards of security - FedRamp High and US Department of Defense IL5.

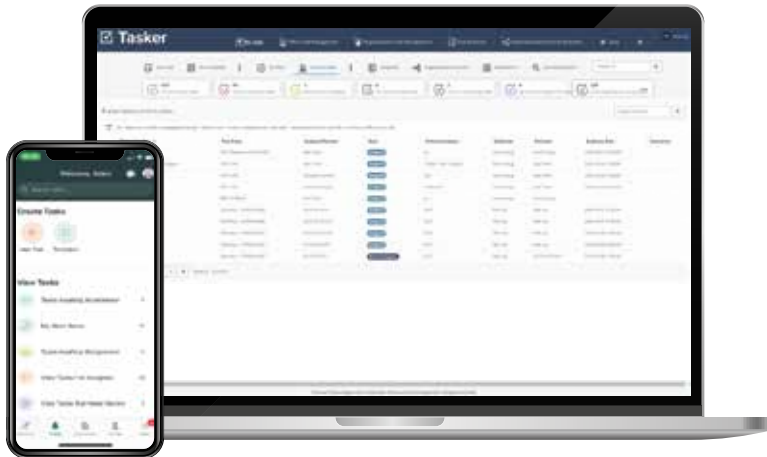

U.S. Department of Defense  
**IL5 IMPACT LEVEL 5**

**Built for Today's Technology-Forward Army**

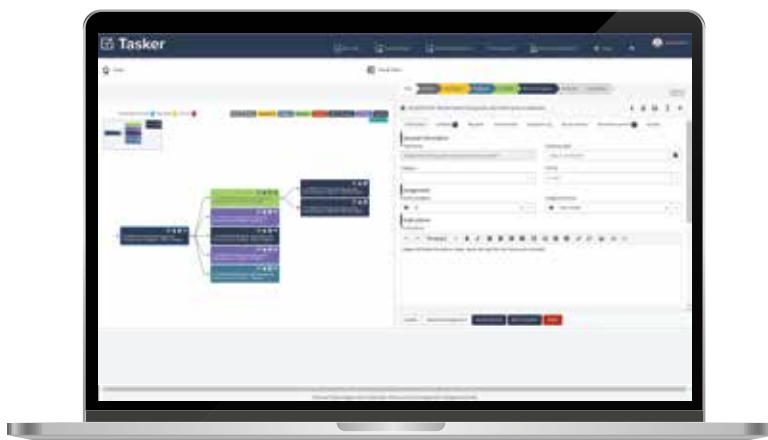

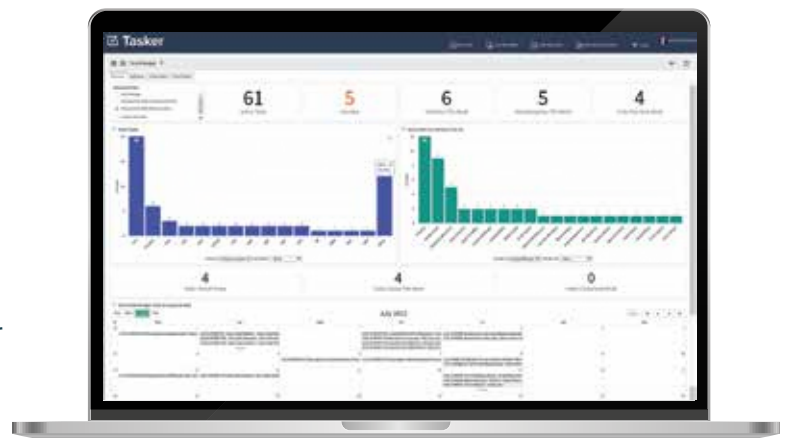

## WorkUI™

Manage your work easily all in one place with the Tasker WorkUI™. Designed with collaborative work management best practices in mind so your critical, ad-hoc, and routine work is completed regardless of location or device. Quickly find all your assigned and delegated tasks, projects, and work. Access each assignment, all attachments, approve, complete, or delegate with ease.

## Reports & Dashboards

Robust and dynamic standard and custom dashboards capture the state of work being performed throughout the organization. Leaders and commanders can review team performance while unit and team leaders can see who is getting work done and where bottlenecks are impacting productivity. All dashboard data can be easily exported in one-click to .csv and .xlsx formats for further analysis or review.

## Intuitive TaskFlow™ Builder

Easily build complex tasks and projects using Tasker's unique TaskFlow Builder. Build and review templates in "task-tree views." Quickly make task and subtasks, adjust assignments, or make ad-hoc changes on the fly to adjust for unexpected challenges. The flexibility and proactive features of Tasker ensure work is completed and nothing is lost.
